|--|--|--|
|  |  |  |
| <p style="text-align: center;">Open Seals (Snap-on)</p> <p>Placed over the overlapping strapping ends either during or after tensioning the strapping. Eliminates pre-threading. Speeds the strapping operation.</p> | <p style="text-align: center;">Closed Seals (Sleeve)</p> <p>Must be threaded over the overlapping strap ends before the tensioning tool is applied. Generally used on bales, bundles, and larger sizes of strap.</p> | <p style="text-align: center;">Push-type Seals (Overlap)</p> <p>Used where strap is tensioned by putting the nose of the tensioner against the seal. Overlapping ends withstand the higher stress.</p> |

| Stock # | Size/Type | Seal Type | Seal Dimensions | Quantity | WT / per 1M |
|---------|-----------|-----------|-----------------|----------|-------------|
| SO-1 | | Open | 1 x 0.020 | 5000 | 5# |

Seals

| | | | | | |
